

# Call for presentations

**17. International Symposium**  
„Magnetoresistive Sensors and  
Magnetic Systems“

**12. & 13. March, 2025**

Dear Ladies and Gentlemen,

At the international symposium “Magnetoresistive Sensors and Magnetic Systems” on **12. and 13. March 2025** in Wetzlar, speakers from science and industry will present new and interesting topics and facilitate a comprehensive exchange of information and experience.

### **Don't miss: Call for presentations!**

*Take the opportunity to register as a speaker now until September 30, 2024!*

Present the results of your basic research or application-oriented research and development and discuss them with an audience of experts from industry, research institutions and universities.

We offer space for **20 presentations** to dive into the rapidly evolving world of magnetoresistive sensors and magnetic systems.

Participation in the event and accommodation are **free of charge for speakers.**

Every contribution includes a 20-minute presentation and a publication in the conference proceedings. The conference language is English in consideration of the international community. Participate with technical presentations, practical examples, and reports from projects. Hand in a suggestion of your contribution.

The following main subjects are planned:

- **Magnetoresistive sensors**
- **Magnetic systems**
- **Magnetic sensor components**
- **Basic technologies of magnetic sensors**

Beyond that you may propose further subjects (enabling technologies) with an application related to MR sensors and magnetic systems.

Submit your proposal by **Monday, 30th of September 2024** ( PDF file, abstract of max. three pages, including graphics) via E-Mail to our coordinator [christiane.eckhardt@sensitec.com](mailto:christiane.eckhardt@sensitec.com).

Take advantage of the opportunity to network and exchange ideas with a community of experts. We look forward to your contribution!

Kind regards from your XMR-Symposium Organizing Team
